THE ECONOMICS OF PERMANENT HOSPITAL-BASED PATIENT BLOOD MANAGEMENT

PBM reduces waste, increases quality, and is patient-centered, contributing to improved economic performance.

Decreased Utilization	Increased Patient Safety
<p>Red Blood Cells</p> <p>75%</p>	<p>22,798</p> <p>Fewer Transfusions/Exposures</p>
<p>5%</p> <p>Platelets</p>	<p>109,395</p> <p>Potential Complications Avoided</p>
<p>↓ Saved</p> <p>\$19.8 million</p> <p>in Activity-Based Costs</p>	

*Across 5 academic systems over a 5-year period

Patient Blood Management Education (PBM)

- 01 Physiology of Anemia
- 02 Pre-Op Evaluation and Anemia Management
- 03 Understanding of Anticoagulation
- 04 Surgical and Anesthesia Interventions
- 05 PBM in Trauma Setting
- 06 PBM in Pediatric Patient
- 07 Bloodless Options
 - Minor Blood Fractions
 - Blood Conservation Strategies/Techniques
- 08 Ethical and Legal Aspects
